SGA Loan Fund Bill Was Defeated By Independents' Own Party 'Whip' CAMPUS POLITICS BATTA CAIDWELL

from of the Student legislature's recent de anvilling as important as a \$4,000 bidget is leat of the bill to create a loan fund was that almost inexcusable; even incomprehensible,

Since the proposal was one of the association's April platform planks, and since a "whip", according to political definition, is a person designated to see that all members of his party vote according to party policy, it would appear that Burrus has voted not only himself but his fellow Independents into a pretty embarrassing

the Independent association's own party "whip".

Reason given for Burrus' actions by furrowbrowed Independent leaders was that he apparently saw an opportunity for self-aggrandize ment in his own medical aid proposal, and took advantage of a beautiful opportunity to kill the loan fund, which had been proposed by someone other than himself. His bill, which calls for a decidedly smaller expenditure, will now in all probability be passed.

Despite the fact it was sloppily drawn up and decidedly hazy in spots, the annual Student Government association budget, calling for a total appropriation of more than \$1,100, passed the Student Legislature Flursday week with out a nurmer of protest being raised.

The document, as listed officially in the minof the SCA is as follows

	intes of the SGA, is as follow	1	
	Social Committee		\$1500.0
	Ahmmi		500,0
	Kentuckian		717.5
	Y.M.C		100,0
	Furniture and Typewriter		150,0

> Not only this, the budget as accepted makes absolutely no reference to the present status of SGA funds: how much money was left over from hast year, how much income was derived from first semester registration fees, how much is expected to be derived in February, and what proportion of the expected total the appropriated \$1,000 represents.

No provision is made for a scholarship or medical aid fund-one of which is almost certain to be set up in the near future. And there were not even dates recorded as to when the budget shall be in effect.

All in all, the budget is about the most slipshod affair that has ever come out of the Sindent Legislature; and yet it was accepted almost at face value and must now be used as the rule which governs the expenditure of more than \$1,000 of the students' money.

From all indications, the Finance committee is not the only sub-division of the SGA which is not functioning with the energy which the student body has a right to expect. The Social committee, which annually is delegated authority over more than \$1200, neglects to make the written reports which the constitution requires it to make; the Rules committee is rather lackadaisical in its work; and the Welfare committee, potentially the most important in the entire SGA, has not even held a meeting, so far as anyone knows.

All this despite the efforts of President Bob Allen, who from all indications, is doing an admirable job of running the presidency and is making a conscientious attempt to make the Student Government association and its constitution work.
